Senate: where each forecast lands

House: where each forecast lands

Seats are each source's own published number for Democrats (Senate = whole chamber, independents who caucus with Democrats included): the average for Call the Map, Silver Bulletin, VoteHub, Split Ticket and Rametta & Hare; DDHQ's headline figure; Race to the WH's projected seats; 50+1 publishes a median. Polymarket and Kalshi: the middle of their seat-count markets, the seat total they price as even odds to be above or below (Polymarket prices Republican seats, so its number is the chamber minus that). The average is the plain mean of the numbers shown.

Silver Bulletin's margins and seat counts are rounded to whole numbers because its exact forecasts are part of its paid subscription; subscribe at natesilver.net for the exact numbers. We've asked Silver Bulletin whether it would like them shown here. * DDHQ's own margin and win chance favor different candidates in Kansas Senate, IA-02, OH-07 and TX-35 (R+1 beside a slight D edge); both are shown as published. No other source does this. **Call the Map**: edition ctm-2.2-20261103-4b0dfb7f0237, frozen at noon ET. **Silver Bulletin**: Nov. 2 (Deluxe version). **DDHQ / The Hill**: Nov. 3, 16:45 UTC. **VoteHub**: Nov. 3, 12:55 UTC (Complete model). **Race to the WH**: Nov. 3, 12:12 AM ET. **Split Ticket**: date not shown. **50+1**: Nov. 3, 05:53 UTC. **Rametta & Hare**: Nov. 3 (default view). **Polymarket**: prices at 2026-11-03 17:44 UTC. **Kalshi**: prices at 2026-11-03 17:44 UTC.

D+3.4 = forecast margin, Dem side minus Republican, in points (**I** = independent). **Small number** = the favorite's chance to win, in 100.

R favored — D favored

* the source's own margin and win chance favor different candidates. • best forecast for Democrats, • best for Republicans in the row (the margins, among models). **Average** margin: every model that publishes one. **Average** chance: every model and market. · = not published. Silver Bulletin margins rounded to whole points; exact numbers for subscribers at natesilver.net. Alaska: our margin is first-choice votes.

D+3.4 = forecast margin, Dem side minus Republican, in points (**I** = independent). **Small number** = the favorite's chance to win, in 100.

R favored — D favored

* the source's own margin and win chance favor different candidates. • best forecast for Democrats, • best for Republicans in the row (the margins, among models). **Average** margin: every model that publishes one. **Average** chance: every model and market. · = not published. Silver Bulletin margins rounded to whole points; exact numbers for subscribers at natesilver.net. Alaska: our margin is first-choice votes.
